Tanwa Sripan

Front end Developer

SUMMARY

Self-disciplined, detail-oriented, Frontend Developer with a passion for building user friendly interfaces. Proven track record of creating and implementing successful frontend web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Recent Projects:

CaughtThemAll (Frontend Web App) – React based web application built using Google's material design concept. The user can search and add new Pokemons, fetched from PokeAPI to their collection. The collection is safely stored to the user's local machine, this allows for the collection to be persisted upon each use.

Furious Consulting (Front End Website) – Fully functional website created with a consulting business client in mind. The website is well designed with responsive layout for mobile and tablet users. The website makes use of fetch API to dynamically generate content.

Tic Tac Toe (Web Application) – Classic game built using React with Artificial Intelligence (AI) logic to increase the level of competition. Users can use the application to play this classic game with their friends and family or test their skills against the AI algorithm.

Web Developer Intern at Kiwi Coding Limited | Southampton, UK

July 2021 — September 2021

Assisted in converting an existing website into a mobile responsive design using CSS and jQuery. Experimented with server-side coding using VB.NET to create dynamic web content. Developed knowledge on database query language using Microsoft SQL Server to create views and stored procedures.

PPI Complaints Handler at HSBC | Southampton, UK

August 2019 — October 2021

Proven track record of meeting KPI's and Quality Audit with consistency while maintaining a high level of investigations to ensure a fair and reasonable outcome.

Mathematics Teacher at Testwood School | Southampton, UK

September 2018 — July 2019

Developed, prepared and delivered well planned lessons to various curriculum levels. Excellent critical thinking skills with the ability to adapt lesson approaches for students with learning difficulties.
